Subject Index

A

Acrylonitrile-butadiene-styrene, environmental stress cracking, anisotropic aspects of, 1174
Acrylonitrile-butadiene-styrene copolymers, deformation modes and fatigue behaviors, 786
Aging
  changes in yield and deformation, polycarbonates, 1142
  enthalpy relaxation of poly(vinyl chloride), stress and vapor exposure effects, 1123
  hot water, polycarbonate, 211
  physical
    enthalpy recovery, model, 1104
    glassy state, molecular dynamics of, 1071
    heavy metal fluoride glasses, 1117
    poly(methyl methacrylate) in the nonlinear range, 1138
  polystyrene below its glass temperature, unified relaxation model, 1111
Ampholytic styrene ionomers, small angle scattering, 385
Anionic polymerizations, living, continuous stirred tank reactor, 391
Annular dies, isothermal swell of extrudate, die geometry, flow rate, and resin effects, 511
Archimedean screw, as an extruder, 624

B

Barium, content, plasticized poly(vinyl chloride) membranes, 936
Bending fatigue life, improved, Kevlar 29, impregnating medium use in, 42
Binary blends, commercial polyarylate, 608
Binary polyamide 6, rubber blends, morphology—properties relations in, functionalized rubber effects, 48
Bitumen-liquid rubber mixtures, torsional braid analysis, 252
Blends, statistical thermodynamics of, 1284
Block polymers, characterization and use in polymer blends, 104
Blown film, rheological properties of, low-density polyethylene resins, 259
Butadiene-acrylonitrile, PVC blend, photodegradation of, 278

C

Carbon fibers, mechanical properties, surface treatment effects, 455
Catalytic ester-amide interchange reaction, polyester/polyamide blends, compatibilization of, 1300
Chain scission, mechanical degradation and, polystyrene, 421
Chalcogenide semiconductors, glassy, electrical behavior of, 1149
Chemiluminescence apparatus, thermal oxidative stability, polymers, 1421
Chopped fiber orientation, wide-angle X-ray diffraction method, 1051
Coat-hanger die, molten polymer, non-isothermal flow, 980
Colloids, polymer, fluorescence techniques, 87
Computer aided engineering, general discussion, 716
Confined parison inflation behavior, high-density polyethylene, 1232
Continuous stirred tank reactor, living anionic polymerizations in, sustained feed oscillations, 391
Copolymerization, radical chain, rate constant model for kinetics of, 22
Copolymers
  thermo stimulated creep of, 127
  water-soluble, 163
Corotating disk processors, enhancement of melting, 1260
Crack tip craze zone, kinetics, before and during fracture, 798
Craze
  cracked, stress and displacement fields at tip, 814
  cracked tip zone, kinetics, 798
  development, poly(methyl methacrylate), stable fatigue crack propagation, 833
  diffraction studies, 825
  failure, midrib creep, 809
Craze fibrils
  disentanglement time, cyclic loading, 820
  formation and breakdown, 761
Creep, rupture, fatigue life prediction, filled polypropylene, 1189
Critical solution temperature, characterization of polymer mixtures, 98
Crystalline morphology, poly(vinylidene fluoride)/poly(methylmethacrylate) blends, 311
Crystallization, kinetics of, binary polymer/polymer blends, 563
CSTR: *see* Continuous stirred tank reactor
Cyclic loading, disentanglement time, 820

D

Demold time, reaction-injection-molding process model analysis, 428
Dextran-g-poly(acrylamide-co-sodium acrylates), synthesis and dilute solution rheological studies, 163
Dibutylphthalate, plasticization of epoxy resin, 1270
Die geometry, isothermal swell of extrudate, annular dies, 511
Drying, time-varying surface concentration, 460

E

Elastomers
  thermoplastic, toughening a linear-low-density polyethylene, 1348
  water diffusivity, 1417
Electrical conductivity, high-temperature, thermal decomposition of Sylgard 184 and, 435
Enthalpy, recovery, physical aging effects, model, 1104
Environmental testing, glass-fiber-reinforced thermoplastic, 1064
Epoxy resin, plasticization of, dibutylphthalate and water, 1270
Ethylene-propylene rubber, blends of polypropylene with, 612
Ethylene-vinyl acetate, PVC blend, photodegradation of, 278
Extrudate, isothermal swell, annular dies, 511
Extruders
  Archimedean screw, 624
  screws
    plasticating, 626
    single, melting of polymers in, mathematical modeling, 988
    thermally developing flow, numerical treatment, 482
    twin, residence time distribution, 645

F

Film extrusion, molecular orientation, high-density polyethylene, 415
Fluorescence techniques, polymer colloids, 87
Fluoride glasses, heavy metal, physical aging, 1117
Foam growth, dynamics of, 1026

G

Gas chromatography, interaction parameter, poly(ethylene oxide)/poly(methyl methacrylate) blends, 287
Gas-liquid technology, manufacture of urea-formaldehyde concentrates, 1245
Gear pumps, performance, polymer processing, 398
Glass
  structural recovery, during isobaric heating, 1087
  transition
    composition-dependent, 135
    molecular kinetic theory, 1079
Glycolic acid, copolyester of, thermal crystallization, 319
Grafting, thermoplastic polymers, ozonation and, thermomechanical pulp, 950
Graphite/epoxy composites, time-dependent changes, pressure and temperature effects, 57

H

Humidity, high storage influences, solid propellants, 275
Hysteresis test, crazing and shear yielding, rubber-toughened polymers, 535

I

Immiscible blends, mechanical compatibilization, 525
Impact loading, polyurethane elastomer, high strain-rate shear deformation, 851
Impregnating medium, improved bending fatigue life, Kevlar 29, 42
Injection molding
crystallizable polymers, heat transfer in, 692
distortion in, temperature gradient effects, 227
dynamics, 686
mathematical models, 673
reaction, polymer blends from polyurethane and poly(methyl methacrylate), 974
Interfaces, interphases and, polymer, 79
Interphases, interfaces and, polymer, 79
Ion-dipole interactions, miscibility enhancement via, 1306
Isobaric heating, structural recovery of glass, thermal history effects, 1087

K

Kevlar 29, bending fatigue life of, impregnating medium and, 42
Kevlar 49, composite performance, thermoset resin microstructure, 930
Kevlar fiber-reinforced ionomer, surface modified, 1047

L

Lactic acid, copolyester of, thermal crystallization, 319
Large bending deformations, response of materials to, simple test method for, 1172
Linear-low-density polyethylene melt rheology, extensibility and extrusion defects, 268
LLDPE: *see* Linear-low-density polyethylene melt rheology

M

Mathematical models
injection molding, 673
melting of polymers, single screw extruder, 988
squashing flows, heated polymer particles, 652
Mechano-chemical degradation, stabilization of polymers and, 1007
Melting, enhancement of, corotating disk processors, 1260
Methanol, copolymers in, anisotropic aspects of environmental stress cracking, 1174
Methyl methacrylate, production, two-stage continuous polymerization process, 442
Mica, polypropylenes filled with, properties of, 169
Microcreep, evolution, poly(methyl methacrylate), microstructural model, 921
Microstructural model, evolution of microcreep, poly(methyl methacrylate), 921
Midrib creep, craze failure, 809
Molecular dynamics, physical aging, glassy state, 1071
Molecular kinetic theory, glass transition, 1079
Molecular networks, deformation behavior of polymers, 724
Molecular weight, polymer blends, liquid-liquid equilibria in, 601
Molecular weight distribution, considerations, polyethylene terephthalate reactors, modeling of, 30
MWD: *see* Molecular weight distribution

N

Necking behavior, low-density polyethylene-isotactic polypropylene blends, morphology, 264
Numerical modeling, nonlinear viscoelastic response, 1409

O

Oligomerization, free radical solution, styrene, 1253
Orthogonal collocation technique, polyethylene terephthalate reactions, solution of final stages, 194
Oxygen, permeability of, polyethylene/polyamide films, 1337
Ozonation, grafting with thermoplastic polymers and, thermomechanical pulp, 970

P

PET: *see* Polyethylene terephthalate
Photodegradation, poly(vinyl chloride) blends, 278
Plastics, drying, time-varying surface concentration, 460
Polyarylate, commercial, binary blends containing, 608
Poly(butyleneterephthalate)-poly(ethylene-co-vinylacetate), polymer blends, 618
Poly(butylene terephthalate), stability, humidity effects, 1043
Polycarbonates
glassy, analysis of deformation processes, 886
hot water aging, 211
physical aging effects, 1142
Polycarbonate blends, polystyrene and polypropylene, 1312
Polycondensation, optimization, polyethylene terephthalate, 1205
Poly(dimethyl siloxane), thermodynamics of, 1219
Polyester
aromatic, chlorinated polymer blends, 350
unsaturated, thermokinetics of, 175
Polyester foam, high-density thermosetting, tensile behavior, 469
Polyester/polyamide blends, compatibilization of, catalytic ester-amide interchange reaction, 1300
Polyester resin, thermosetting, injection molding of, 473
Polyethylene
α-Al_2O_3/joint, silane treated, durability and failure analysis
chlorinated, impact modification of poly(vinyl chloride), 869, 877
density determination, ultrasonic velocity measurement, 1354
high-density
confined parison inflation behavior, 1232
molecular orientation in film extrusion of, 415
linear-low-density, toughening, using thermoplastic elastomers, 1348
opitcal properties applied to, crystalline polymers, 328
study of, critical solution temperature and, 98
thermo stimulated creep of, 127
tubular film extrusion, 1185
Polyethylene blown films, high density, plastic deformation and tearing, 895
Polyethylene melt, linear-low-density, rheological properties of, 1215
Poly(ethylene oxide), poly (methyl methacrylate)blend, gas chromatographic determinations, 287
Polyethylene/polyamide films, permeability of oxygen and water vapor through, 1337
Polyethylene-polypropylene blends, morphology of, 488
Polyethylene resins, low-density, rheological properties of blown film, 259
Poly(ethylene terephthalate), orientation studies, 376
Polyethylene terephthalate
polycondensation step, optimization of, 1205
reactors
modeling of, molecular weight distribution considerations, 30
optimization of the transesterification stage of, 185
solution of final stages, orthogonal collocation technique, 194
thermal stability of, 1056
Poly(ethylene terephthalate), stretch-blowmolded bottles, orientation, 1390
Polyethylene tubes, crosslinked, thermal energy storage, 1227
Polyethylene tubular film, optical clarity, crystalline orientation and, 1035
Polyimide
soluble aromatic, mechanical properties and molecular aggregation, 1021
voids in, 345
Polymer alloys, bulk and surface thermodynamics, 598
Polymer blends
application of, 587
aromatic polyester/chlorinated, 350
binary polymer, solid morphology, kinetics of crystallization and thermal behavior or, 563
block polymers in, 104
from polyurethane and poly(methyl methacrylate), reaction injection molding, 974
incompatible, phase morphology in, 1327
interaction, thermodynamic and scattering measurement relations, 555
inter- and intrachain elastic interactions in, 520
kinetic and sterile limitations to, 112
liquid-liquid equilibria, 601
non-equilibrium morphologies, 541
poly(butyleneterephthalate)-poly(ethylene-co-vinylacetate), 618
polypropylene based, 544
thermodynamic interaction parameter, 1291
Polymer colloids, fluorescence techniques in, 87
Polymer conformation, characterization, small-angle neutron scattering, 1
Polymer glasses, stressed, statistical entropy model, 915
Polymeric alloys, theory, recent advances, 70
Polymerization
thermal catalytic, mortars impregnated with styrene-acrylonitrile, 1240
two-stage continuous, production of methyl methacrylate, 442
Polymer melts, measurement of mixing, focused ultrasound, 1277

Polymer particles, heated, mathematical modeling of squashing flows, 652
Polymers
amorphous
formation of glass on the α and β relaxations of, 1202
orientation of, 956, 965
block, use in polymer blends, 104
crystalline, optical properties applied to polyethylene, 328
crystallizable, heat transfer in injection molding of, 692
crystallization, general treatment of, 1396, 1402
deformation behavior, molecular networks and thermally activated processes, 724
glassy
metallurgical approach to pre-yield and yield behavior, 737
oriented, thermal expansion of, 205
inter- and intrachain elastic interactions in, 520
interfaces and interphases, 79
linear-low-density polyethylene/polypropylene/ethylene-propylene block, rheological and mechanical properties of, 1319
mixtures, critical solution temperature in study of, 98
molten, non-isothermal flow, coat-hanger die, 980
processing, performance of gear pumps in, 398
rigid-rod, used as high-performance materials, 218
rubber-toughened, crazing and shear yielding in, 535
semicrystalline, microstructural aspects of failure, 770
solid
deformation recovery behavior, tensile yielding, 1429
thermodynamic behavior, uniaxial deformation, 908
stabilization of, mechano-chemical degradation, 1007
thermal oxidative stability of, chemiluminescence apparatus, 1421
thermoplastic, ozonation and grafting with, paper properties of thermomechanical pulp, 950
Polymer solutions, thermodynamics of, 1219
Polymer systems, multiphase, transient sorption and permeation of small molecules in, 153
Poly(methyl methacrylate)
analysis of evolution, microstructural model, 921
craze development in, during stable fatigue crack propagation, 833
physical aging, nonlinear range, 1138
poly(ethylene oxide) blend, gas chromatographic determinations, 287
polymer blends from, reaction injection molding, 974
poly(vinylidene fluoride), crystalline morphology, 311
Poly(α-methyl-α-N-propyl-β-propiolactone), poly(vinyl chloride) blends, dielectric properties, 144
Polyolefins, wood fibers as reinforcing fillers for, 1166
Poly(phenylene sulfide), compression-molded, surface structure and crystallinity, 1383
Poly(p-phenylene terephthalamide), films, liquid crystalline sulphuric acid solutions, 242
Polypropylene
based, polymer blends, 544
blends
isotactic, spherulite growth in, 1155
low-density polyethylene-isotactic, necking behavior of, 264
with ethylene-propylene rubber, 612
filled, fatigue life prediction, based on creep rupture, 1180
mica-filled, properties of, 169
polycarbonate blends with, 1312
study of, critical solution temperature and, 98
thermo stimulated creep of, 127
Polystyrene
below glass temperature, aging, unified relaxation model, 1111
mechanical degradation, chain scission and, 421
polycarbonate blends with, 1312
spectroscopic observations, 1130
Polyurethane, polymer blends from, reaction injection molding, 974
Polyurethane elastomer, high strain-rate shear deformation, impact loading, 851
Polyurethane foam
rigid
glass fiber-reinforced, 943
glass fiber-reinforced, stress relaxation, 1000
Polyurethane/polyvinyl interstitial composites, microphase structure and properties of, 293
Poly(vinyl chloride)
blends, photodegradation of, 278
enthalpy relaxation, aging, stress and vapor exposure effects, 1123
impact modification, chlorinated polyethylene, 869, 877
nonequilibrium glassy, spectroscopic observations, 1130
plasticized, membranes, deformation behavior with barium content, 936
poly (α-methyl-α-N-propyl-β-propiolactone) blend, dielectric properties, 144
Poly(vinylidene fluoride), poly(methylmethacrylate) blend, crystalline morphology, 311
Positional small angle x-ray scattering, from flaws, 373
Premature gelling, reaction-injection-molding process model analysis, 428
Pressure
composition-dependent glass transition, 135
time-dependent changes and, graphite/epoxy composites, 57
Propellants, solid, influence of high storage humidity, 275
PSAXS: *see* Positional small angle x-ray scattering
PVC: *see* Poly(vinyl chloride)

R

Racemic poly(γ-benzyl glutamate), reformation of structure, rheo-optical study of, 355
Rate constant model, radical chain copolymerization, 22
Reaction-injection-molding process model, applications of, premature gelling, demold time, and maximum temperature rise analysis, 428
Reactive systems, processing, rheological and heat-transfer considerations for, 698
Relaxation model, unified, polystyrene below its glass temperature, 1111
Residence time distribution, twin screw extruder, 645
Resin, characteristics, isothermal swell of extrudate from annular dies and, 511
Rheo-optical study, reformation of structure, racemic poly(γ-benzyl glutamate), 355
Rubber
functionalized, binary 6/rubber blends and, 48
mixtures, bitumen-liquid, torsional braid analysis, 252
transfer molding, flow analysis, 403

S

SANS: *see* Small-angle neutron scattering
SAXS: *see* Small angle X-ray scattering
Screw extruders, *see* Extruders
Semicrystalline polymers, microstructure, 770
Shear bands, behavior and properties, 750
Short fiber composites, high pressure effects, mechanical behavior, 844
Slit dies, entry and exit flows, numerical simulation, 707
Small-angle neutron scattering, polymer conformation and morphology through, 1
Small angle scattering, ampholytic styrene ionomers, 385
Small angle X-ray scattering, voids in polyimide, 345
Spherical bubbles, foam growth, 1026
Spherulite, growth, isotactic polypropylene-based blends, 1155
Spherulitic poly-alpha-olefins, dynamic x-ray diffraction studies, alpha and beta mechanical dispersons, 361
Stress-deformation behavior, viscoelastic elastomers, 862
Styrene, free radical solution oligomerization of, continuous-stirred tank reactor train, 1253
Styrene-acrylonitrile, mortars impregnated with, thermal catalytic polymerization of, 1240
Styrene-acrylonitrile copolymers
anisotropic aspects, environmental stress cracking, 1174
deformation modes and fatigue behaviors, 786
Sulphuric acid solutions, liquid crystalline, poly(p-phenylene terephthalamide), 242
Sylgard 184, thermal decomposition, high-temperature electrical conductivity, 435

T

Temperature
composition-dependent glass transition, 135
time-dependent changes and, graphite/epoxy composites, 57
Temperature gradient, residual stresses, distortion in injection moldings, 227
Temperature rise, maximum, reaction-injection-molding process model analysis, 428
Ternary blends, linear-low-density polyethylene/polypropylene/ethylene-propylene block polymers, 1319
Thermal conductivity, glass fiber-reinforced rigid polyurethane foam, 943
Thermal energy, storage, columns packed with crosslinked polyethylene tubes, 1227

Thermal expansion
glass fiber-reinforced rigid polyurethane foam, 943
oriented glassy polymers, 205
Thermally activated processes, molecular networks and, deformation behavior of polymers, 724
Thermal stability, polyethylene terephthalate, 1056
Thermodynamics
interaction parameter, polymer blends, 1291
statistical, blends, 1284
Thermokinetics, unsaturated polyester, vinyl ester resins, 175
Thermomechanical pulp, evaluation of paper properties, ozonation and grafting with thermoplastic polymers, 950
Thermoplastics, glass-fiber-reinforced, environmental testing, 1064
Thermoplastic melts, flow of, 501
Thermoset resin, microstructure, Kevlar 49, 930
Thermosetting
high-density, polyester foam, 469
polyester resin, injection molding of, 473
Thermo stimulated creep, polyethylene, polypropylene, copolymers, and blends, 127
Titanate coupling agents, processing composites with, 1369
Toner particles, roll fusing in, rough paper, Xerographic process, 662
Torsional braid analysis, bitumen-liquid rubber mixtures, 252

TSC: *see* Thermo stimulated creep
Tubular film extrusion, various polyethylenes, 1185
Tubular viscoelastic film, inflation of, role of diffusion during, 1249

U

UHMWPE/MDPE mixtures, rheological and mechanical behavior of, 117
Ultrasound
focused, measurement of mixing in polymer melts, 1277
velocity measurement, density determination of polyethylene, 1354
Uniaxial deformation, solid polymers, thermodynamic behavior, 908
Urea-formaldehyde concentrates, manufacture, gas-liquid technology, 1245

V

Vinyl ester resins, thermokinetics of, 175
Viscoelastic elastomers, stress-deformation behavior, 862
Viscoelastic response, nonlinear, numerical modeling and experimental verification, 1409

W

Water
diffusivity, elastomers, 1417
plasticization of epoxy resin, 1270
Water vapor, permeability of, polyethylene/polyamide films, 1337
WAXS), *see* Wide-angle X-ray diffraction method
Wide-angle X-ray diffraction method, chopped fiber orientation, composites with application to extrusion through dies, 1051
Wire insulating lines, computerization of, 633
Wood fibers, reinforcing fillers, polyolefins, 1166

X

Xerographic process, rough papers, roll fusing in toner particles, 662
X-ray diffraction studies, dynamic, spherulitic poly-alpha-olefins, 361
